

Forbo Pinboard

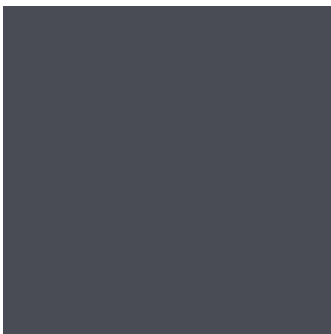

Natural and durable.

Bulletin Board is produced from natural and renewable raw materials. A combination of oxidized oil, rosin and finely ground cork gives Bulletin Board its flexibility and resilience. The combination results in a product with exceptional durability and a sustainable footprint.

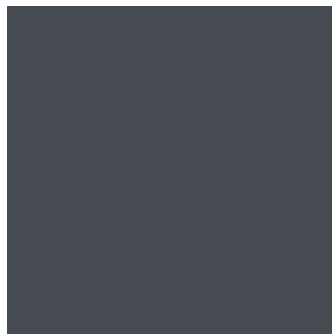

Strength and resilience make Bulletin Board the ideal material, the board material retains its grip and doesn't crumble like traditional soft boards as the pinholes close after extraction of the pins.

Practical and Hygienic.

Bulletin Board does not attract dust and has bacteriostatic properties.
